Nail Art Studio's 10-12 week courses in Nail Technology enables Laurie Galvin to deliver this training and to provide a completed certificate of Attainment on all aspects of becoming a Professional Nail Technician.

The courses delivered is designed to equip learners with the necessary skills in communication, knowledge of common skin conditions and artificial nail enhancements. I aim to provide every individual with the skills and confidence that every participant will need to join into any salon, providing nail services to the highest standard.

Students with passion for a career in nails could be placed as a permanent Nail Technician/Artist within Nail Art Studio, also included in the course if you are available to work part-time in the studio to further your experience working with other nail technicians learning different techniques as everyone has their own individual style.

*It is essential that students provide their own models during the course. By encourage family and friends to be your working model, students gain benefit of practicing skills with people they are comfortable with as well as establishing an initial client base for your business. Approximately 3 model will be needed. For health and safety **NO** children will be able to attend during course times.*

Nail Art Studio will provide all products and equipment during training sessions. The staff and myself are proud of our friendly and relaxed atmosphere, we like our students to feel at home. Students need only to bring their acrylic brush to class which is supplied in the kit. Acrylic kits are designed for self study and practice out of class hours.

Thanks everyone hope to see you in class.
